- Hope Timber Garden Center 522-6558

Tips

On the bottom of plastic products there is a recycling number in the recycling chasing arrows. Put in drop-off trailers according to #1 or #2

But What About ... ?

Disposal Options

Suburban Recycling and Disposal Facility 740-787-2327
State Route 668 South

Fallsburg Road Landfill - construction and demolition waste recycling
322-5733 Located at 7271 Fallsburg Rd./ State Route 79 North

SWACO— (Solid Waste Authority of Central Ohio) 614-871-5100
Check SWACO'S website www.swaco.org for those hard to dispose of items.

Common Household Hazardous Waste

Gasoline (old) may be strained through a paper filter and diluted with fresh gasoline by one half. This mixture may sometimes be used in your lawnmower, but be sure to check the owners' manual.

Latex and oil paint can be disposed of safely in three ways:

1. Use it up. If you don't have very much paint, spread it on cardboard or newspaper. Let it dry and discard it with your regular trash.
2. If you have a half a can or less of paint, open the can and let it dry out in a well-ventilated area. Keep it away from an open-flame, rain, children or pets. To speed the drying process, add equal amounts of absorbent material, such as kitty litter or a product called Paint Hardener. When completely dried out, discard with your regular trash.
3. Full or nearly full cans of usable paint can usually be donated. Try contacting local churches, housing programs, or school art, local theater or drama departments.

Paper Recycling

Abitibi-Bowater is the largest paper recycling company in the world. Abitibi-Bowater has put Paper Retriever containers at most local schools and at each of the Licking County drop-off sites. To find out if there is a container close to you check out their website at www.paperretriever.com. Abitibi-Bowater recycles office paper, magazines, newspapers and mail. They DO NOT take phone books or cardboard.

What Are Other Ways To Recycle

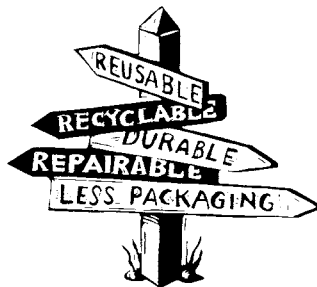

Composting

Composting returns organic material to the soil in a usable form.

Organic matter in the soil improves plant growth.

Two easy ways to compost:

1. Leave your grass clippings on your yard after mowing. This helps your soil.
2. Recycle your kitchen waste (do not use meat or dairy products), newspapers, sawdust and yard waste. Put the material in a bin with enough soil to cover. You must keep the waste moist and turn occasional. Use the compost on your garden, around your trees and shrubs for better plant growth. To learn more about composting check out the following websites; ohioline.ag.ohio-state.edu and <http://home.howstuffworks.com>
3. If you do not have room for composting, you can take your materials to local composting businesses such as the Compost Farm or Elm Recycling.
